

Garage Door Insulation Kit

One of the easiest and most cost-effective ways to increase the energy-efficiency of your home!

The largest uninsulated space in most homes is the garage door. Insulfoam's Garage Door Insulation Kit provides an easy solution for increasing the energy efficiency of your home. The kit is environmentally friendly and features a foam core that is 100% recyclable, providing an alternative that not only offers superior insulating properties but also promotes a cleaner, healthier environment!

HIGH-IMPACT FACER FOR ADDED PROTECTION		
WIDTH 20$\frac{1}{4}$ in	LENGTH 54 in	THICKNESS 1$\frac{1}{4}$ in
PANELS 8	ITEMS INCLUDED 8 Insulation Panels Installation Instructions	

- ✓ Saves energy by decreasing heating and cooling costs
- ✓ Significantly reduces interior noise
- ✓ Panels tightly fit standard garage sizes, reducing any energy loss
- ✓ Can be installed in less than an hour
- ✓ Rigid high-impact panels reduce energy loss, and look more professional compared to rolled insulation
- ✓ Panels can be cut to fit non-standard garage doors

This kit insulates most standard 8' or 9' garage doors.

Garage Door Insulation Kit

STANDARD SIZE

This kit insulates most standard 8' or 9' garage doors.

TOOLS REQUIRED

Straight edge Tape measure
Utility knife Safety glasses

Installation Instructions

Tools Required:
Straight edge, utility knife, tape measure and safety glasses.

Measure length between vertical rail A to the inside edge of vertical rail B.

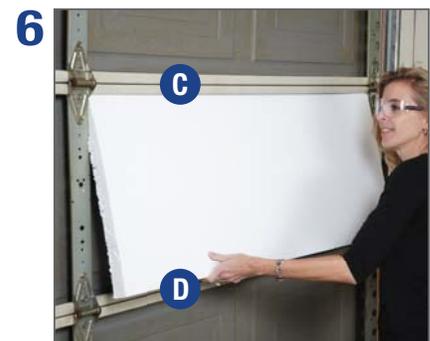

Cut each insulation panel to length.

Break off the insulation where cut.

Insert the excess insulation behind the vertical rails.

Insert the insulation panel between horizontal rails C and D with the channeled or grooved side facing the garage door.
